Key responsibilities of the role include:

- Working with Specialised tooling / Machines.
- Completing standard PM work on existing plant and equipment.
- Dismantling, Repair/ make new parts and fitting of new parts when performing PM.
- Maintain Quality, Safety and Environmental standards at all times.
- Keeping maintenance records & Report Writing, updating on Flexmaintenance system.
- Installation of Plant Equipment.
- Participating in equipment improvement projects.
- Call out cover required as part of this role.

Skills and experience required:

- Candidates must have completed a formal Apprenticeship training programme.
- Relevant Industry experience required.
- Knowledge of mechanical and electrical equipment.
- Plan and organise their work in order to meet daily schedules and output targets.
- Have an understanding of Quality, Environmental and Safety standards in the workplace.
- Be punctual with an excellent attendance record.
- Good attention to detail.
- Basic PC skills desirable.
- Ability to work well in a team as well as on their own initiative.
- Experience in Arc and Mig Welding Fabrication an advantage.

Please email your CV and cover note to recruitment@dromone.ie to apply for this role.
