

Manufacturing Operative- Phase 3 Service Centre

We are currently recruiting for a **General Operative** to join our manufacturing team.

Reporting to the Phase 3 Service Centre Team Manager, this role will **include night shift work on a rotating 3 cycle shift basis.**

The successful candidate will be responsible for supporting the Service Centre processes. These processes include but are not limited to; sheet metal component cleaning, sheet metal cutting process support, forming, product preparation and kitting for onward processing in the Agriculture, Construction and R&D business units.

Job Function:

To aid in the cutting and cleaning processes in production of parts from Oxy Profiling, maintain quality and safety standards, keeping records, maintaining equipment and consumables in a busy manufacturing environment.

Key responsibilities include:

- Assist in the production and cleaning of good quality parts in line with production demand
- Determining and acquiring the necessary tools, jigs, fixtures and other equipment required to set-up and perform the specified operations
- Adhering to quality procedures and processes in line with ISO 9001 quality standards
- Maintain safe operations by adhering to safety procedures and regulations at all times
- Maintain continuity between work shifts by communicating actions, irregularities with team manager and fellow operators
- Document actions by completing production and quality logs as required.

Skills and experience required:

- At least 1 to 3 year's experience in a heavy manufacturing environment
- Knowledge of cutting and cleaning machinery
- Good communication skills
- Attention to high quality standards
- Good housekeeping standards
- Ideal industry background: manufacturing, automotive
- Forklift driver licence and the ability to read and interpret technical drawings an advantage.
