

## **Manufacturing Operative- Construction Product Line**

In line with ongoing Process development projects within DROMONE, we are currently recruiting for the following vacancy: **Manufacturing Operative.**

This position is based over a 39 hour working week reporting to the Construction Final Assembly Team Leader. The role may include overtime & shift work outside the normal working day from time to time.

### **Job responsibilities:**

- The main duties include the operation of shot blasting equipment on a daily basis ensuring high quality product is being processed to meet exacting internal and customer specifications.
- Responsible for the quality of the products before releasing to paint line processes by visual inspection of parts to determine compliance with standards.
- Reporting any deviations from the required standard immediately to area supervisor so problems are quickly identified and addressed.
- Some repair work may be required for specific tasks.
- This job requires a level of physical activity in the various assembly processes.

### **Skills and experience required:**

- At least 2 to 3 years manufacturing experience in a production assembly environment.
- The ability to read and interpret documents such as safety rules, technical drawings, operating instructions and procedures to produce products to customer's exact specifications.
- Ability to work to tight deadlines in a busy production environment.
- Strong work ethic with attention to detail.
- Forklift driving experience required with a current licence an advantage.
- Excellent English and communication skills.
- Be able to plan work priorities and make decisions.
