DROMONE®
intelligent:innovation

Maximum Safety

The DROMONE Pallet Forks allow for rapid and safe attachment changeover without leaving the cab of the excavator.

Easy & Quick Manoeuvrability

Easy access and manoeuvrability on site than with a standard telehandler, moving bulky and palletized material easily and quickly.

Higher Weight Lifting Capacity

Optimal fork lengths meaning a higher weight lifting capacity.

Fully Flexible

Fully adjustable flexible pin arrangement allows pallet forks to fit a large variety of excavators.

Fully compatible with most universal quick couplers, and ranges of pallet forks designed to suit machines from 6 - 22 tonnes.

1.2 metre fork lengths available.

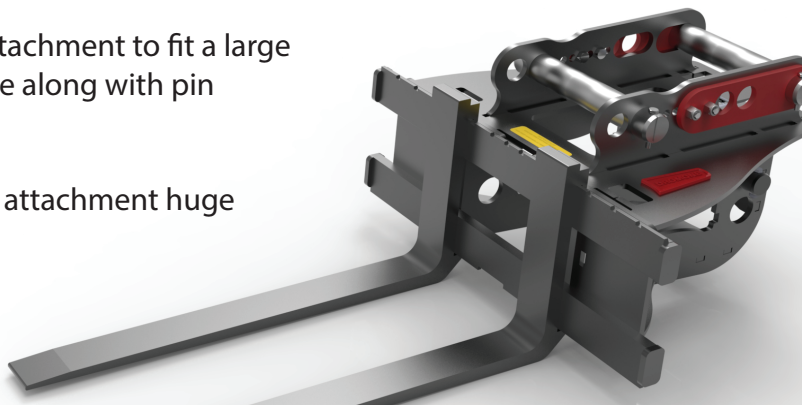

Variable Pin Centres

The DROMONE variable pin centres allows for this attachment to fit a large variety of machines. Both pin positions are adjustable along with pin diameters. *

The innovative sliding plate on the link pin gives the attachment huge range in terms of adjustable pin centres.

*Variable pin diameters on 10-24 ton only. 6-9 ton supplied with 50mm adapter sleeve.
