

LANDSCAPING BUCKET

The DROMONE Landscaping Bucket enables smooth digging, grading and separation without the need for rotovators or hand rakes.

Reduces site clearance and finishing times increasing work load capacity.

The DROMONE Landscaping Bucket eliminates the need for manual raking and tilling while leaving surfaces ready for sowing or turfing.

Enables smooth digging, grading and separation without the need for rotovators or hand rakes.

Fully adjustable pin centres gives increased flexibility to fit a large range of excavators.

Reduces site clearance and finishing times, increasing work load capacity.

Optimal rib and tine design allows efficient gathering of both light and bulky debris.

Narrow tines eliminate the build up of damp clay during operation.

Fully compatible with all DROMONE Quick Couplers.

Bucket size ranges available to suit machines from 0.8 - 22 tonnes.
Widths from 900mm to 2400mm.
