**40** Years  
in business

## Our Story

DROMONE is an innovative supplier of safety critical components in the agriculture and construction industries. We work hard to innovate, design and build the best products for a fast changing world. Since 1978, our culture, heritage and focus on the very best quality has all helped shape our philosophy; to help people and make their everyday lives safer and more productive.

We operate on a global scale, exporting almost 100% of our products to 39 countries worldwide. Our portfolio of customers includes Blue Chip customers in the agriculture and construction industries. Using highly automated technology and machinery, we manufacture our product to our customers specific needs.

DROMONE has long valued the ongoing learning and development of all of our employees. We are an Accredited Continuous Professional Development Employer with Engineers Ireland. The ethos of life-long learning is extremely important to us and instills our belief in our "intelligent:innovation" dictum by which we strive to differentiate ourselves in a rapidly changing and competitive marketplace.
