

TILT COUPLER

intelligent
innovation:

A Tilting Coupler with all the advantages of the Multi-Lock quick coupler, giving you increased flexibility and asset utilization.

Total tilting angle of 180 degrees allows efficient shaping of gradients and cambers without needing to reposition the excavator.

High quality hydraulic actuator gives solid angular stability.

High quality hydraulic kit design for smooth operation and control.

Compatible with all major brands of machines and attachments.

Ranger style coupler for fast and simple attachment interchange.

Coupler automatic locking system is constantly visible from the cab for increased safety and reassurance.

Available to suit machines from 3 to 24 tonnes.
